

Why a chair mat is essential, whether working from home, the home office or office.

1. Protection for all types of flooring combined with an ergonomic performance that not only protects your home, but also your back and legs.

With many more of us working from home or from a home office, it is important to protect our floors and carpets from the expensive wear, tear and damage that occurs during everyday use.

A caster based chair can travel up to eight miles a year!

The stress this puts onto carpets and hard floors is extreme - and the cost to repair or replace damaged flooring can be considerable!

Floortex Chair Mats are the leading solution to damage prevention, whether used in specific chair mat applications or for more general surface protection.

Available in Polycarbonate, PVC and Enhanced Polymer, all provide incredible protection combined with a rigid construction that creates a superior perfectly flat surface.

As a result, the easy-glide top makes moving easier and smoother, taking strain off your back and legs and providing excellent ergonomic performance.

Whether used under chairs or to protect floors from a range of household and office applications, including gaming chairs, high chairs, exercise equipment, heavy furniture and kitchen appliances, Floortex Chair Mats are the perfect protection solution.

2. Enhance and protect your home and home office.

Not just a Chair Mat, but a vital part of looking after your home.

Whichever Chair Mat you choose, this vital piece of home and office protection allows you to work, exercise and play, confident that your flooring is being protected in the best possible way.

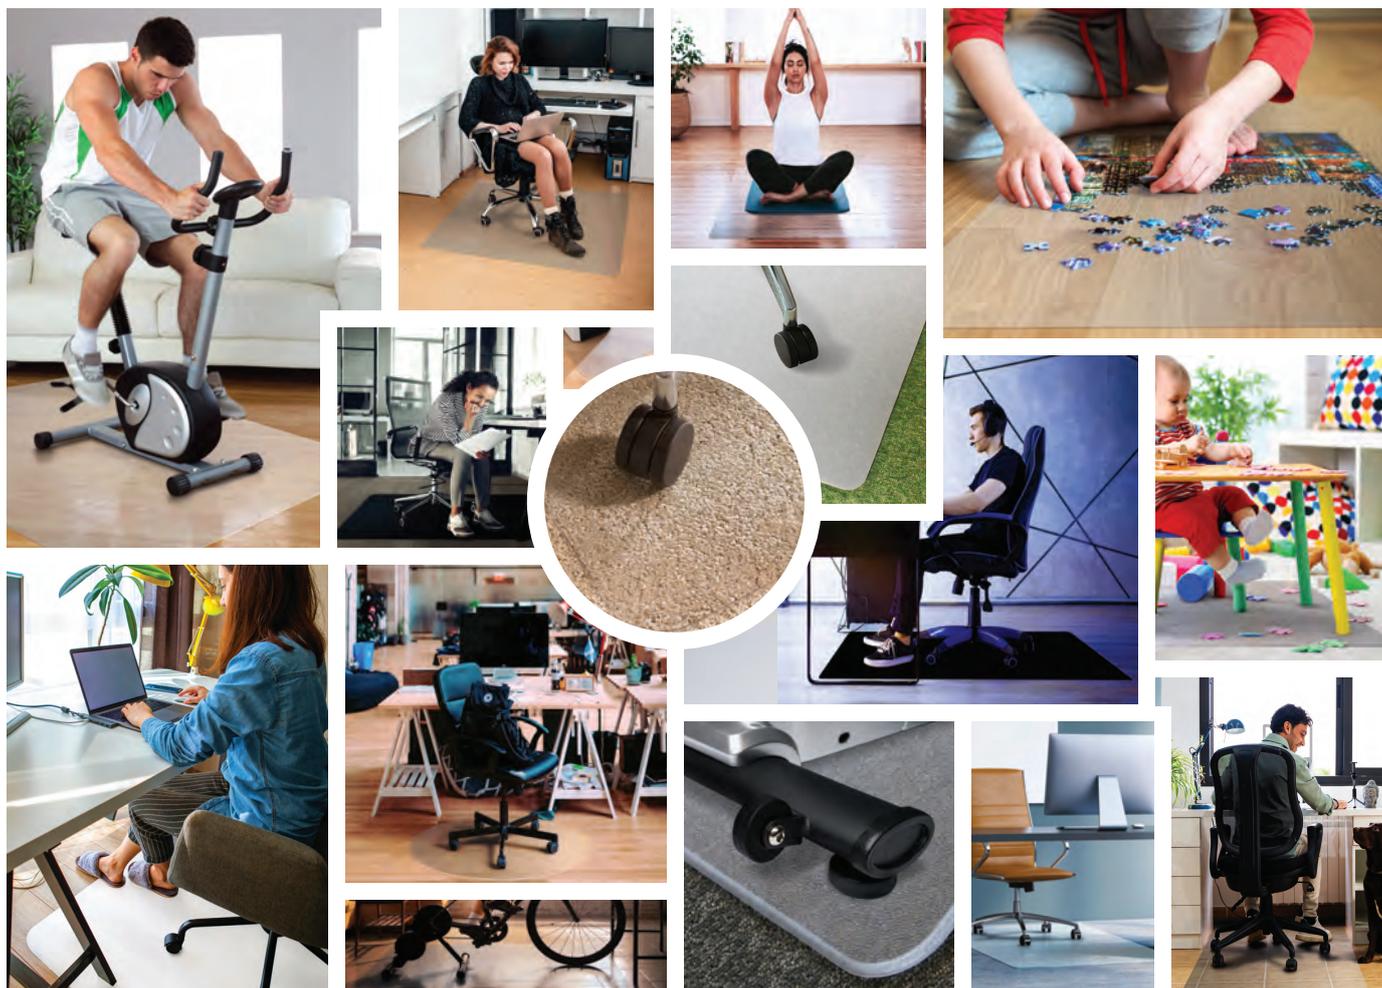

Working from home or having a home office brings the workplace into your house. The rigors and wear that are normally associated with the office can now effect your personal furnishings.

It is therefore essential to prevent expensive damage being caused and to also provide suitable ergonomic support in an environment that is not necessarily best equipped to provide it.

A Floortex Chair Mat allows easy movement of chairs and caster based chairs on all types of floor surface. This is essential in reducing the strain put onto your back and legs - and great in helping reduce fatigue and improve concentration.

These essential factors do not mean that you have to give up on style and good design in your home. The high clarity of Chair Mats allows the natural beauty of your flooring to still be realised and your interior design uncompromised.

These versatile protection mats can also be used for loads of other purposes rather than only under chairs! Anywhere your flooring needs protecting; indoor exercise equipment, gaming chairs, exercise space or even play areas for the kids - these mats are perfect!

3. Choose a specific mat to suit your needs and budget.

Available in various sizes and shapes and designed specifically for either carpets or hard floors, means you can protect your floors wether at work or at play, in the home or at the office.

For Carpets and Hard Floors

**GRIPPER
BACK**

CARPETS

**SMOOTH
BACK**

HARD FLOORS

**Carpet Floor options
Gripper Back for:**

Low / Medium Pile and Deep Pile Carpets.

**Hard Floors
Smooth Back for:**

All types of hard floors and carpet tiles.

Chair Mats for use on hard floors like wood and tiles have a smooth back.
Chair Mats for use on carpets have small 'grippers' on the back to stop the mat sliding when being used.

Depending on which type of material you choose, Chair Mats perform at different levels and suit all budgets.

Original Floortex Polycarbonate mats are the ultimate option, providing superior protection and ergonomic performance.
These mats are also immediately ready for use and are flat straight from the box.

Floortex Phthalate Free PVC mats are the more economical option, they take a little while longer to unroll and flatten, but still provide excellent protection.

Mats made from Polypropylene or Enhanced Polymer are also excellent performers and give you a great 'green' option.

Made from either foldable PP with a greatly reduced carbon footprint or from up to 50% recycled EP, they are both 100% recyclable.

4. Original Floortex Polycarbonate Chair Mats.

When you need strength, performance and clarity

Incredibly tough and durable polycarbonate mats have twice the impact strength of mats that are manufactured from vinyl.

Polycarbonate chair mats are made from the same type of material that is used in the production of aircraft screens, bullet proof glass and protective shields.

Manufacturers Limited Lifetime Warranty.

Without doubt, these mats provide both the best protection and ergonomic performance for your home.

- High clarity allows the beauty of your hard floor or carpeted flooring to shine through.
- Polycarbonate will not curl, crack, discolor or smell under correct application.
- Unlike vinyl, our polycarbonate mats will not affect lacquered or varnished flooring and are compatible with under floor heating systems.
- Our Polycarbonate mats go flat and stay flat, if delivered rolled they unroll ready for instant use.
- PVC free, phthalate free, odorless and completely free of any toxic chemicals with minimal gas emissions. GREENGUARD GOLD Certified.
- Made in the UK using 25% renewable wind & solar power
- 100% recyclable

5. Phthalate Free PVC Chair Mats.

Great value, great protection and versatility

PVC Mats are the most economical floor protection option. Not as high performing as Polycarbonate, but still an excellent and versatile solution.

- Protects all types of floors from chair caster damage, spills and scuff marks.
- Provides an ergonomic gliding surface, for caster based chairs, to reduce strain on your legs and lower back.
- Free of phthalates, tin, lead & cadmium. Safe for use around children or pets.
- Ideal for carpets, hardwood floors, laminate floors, floor tiles or stone flooring.
- Easy to wipe clean and maintain.

6. Enhanced Polymer Chair Mats.

A greener chair mat that does not compromise on performance.

- Unique Floortex enhanced polymer, contains up to 50% recycled content.
- Rigorously tested to high performance standards.
- Fully recyclable.
- Manufactured using renewable energy from an on-site wind turbine and solar farm.
- Options of smooth back mats for hard floors and gripper-back for carpets.
- Anti-slip option available for highly polished floors.
- Wide range of sizes available.
- Non-toxic, phthalate free and safe to use in offices or homes with children and pets.

7. Polypropylene Chair Mats.

The next generation of eco-friendly Chair Mats that provide superior floor protection with a reduced carbon footprint and great value prices.

- 100% recyclable for further use at end of life.
- No significant material degradation means it can be recycled and used in new products.
- Folding and non-folding options.

- Folded options allow highly efficient and economic shipping (reducing their carbon footprint) and are great for use and portable versatility around the home and office.
- No PVC, BPA, tin, lead, cadmium or heavy metal content.
- Anti-slip for hard or polished floors and with new 'Supa-Gripper' backing for carpets.
- Non-toxic, phthalate free and safe to use in offices or homes with children and pets.
- ISO-9001:2000, EN 425:2002 and EN 423:2001 standards.

8. Our quick guide to help you choose the best Chair Mat for you and your home.

Protect your hard floors and carpets from expensive damage, abrasion and wear.

What size or shape?
When deciding on the best size and shape of chair mat you may need, it may help to consider the following:

- Your total floor space
- The width of your workstation
- The size of your chair base
- Your 'Roll Area' (i.e: How much area you cover when you roll to retrieve items or manoeuvre around your work space)

Examples of popular chair mat shape options

Rectangular
Super versatile, any place, any use.

Lipped
Designed for use under desks.

Contoured
Designed to accommodate 90% of chair movement patterns.

For floor protection & improved ergonomics:

Carpets
Carpet damage caused by office chairs.

Hard Floors
Damage caused by office chair to a hard floor.

No damage when you use a chair mat.
+ Easy-glide movement.

Your floor is protected with a chair mat.
+ Easy-glide movement.

How to choose a chair mat
Check your surface:

Carpets
Gripper back for carpet.

Hard Floors
Smooth back for hard floors.

Eco credentials
All our chair mats are 100% recyclable and are manufactured in the UK using 25% renewable energy - from an on site wind turbine and solar farm.

Which material? Choose your preference:

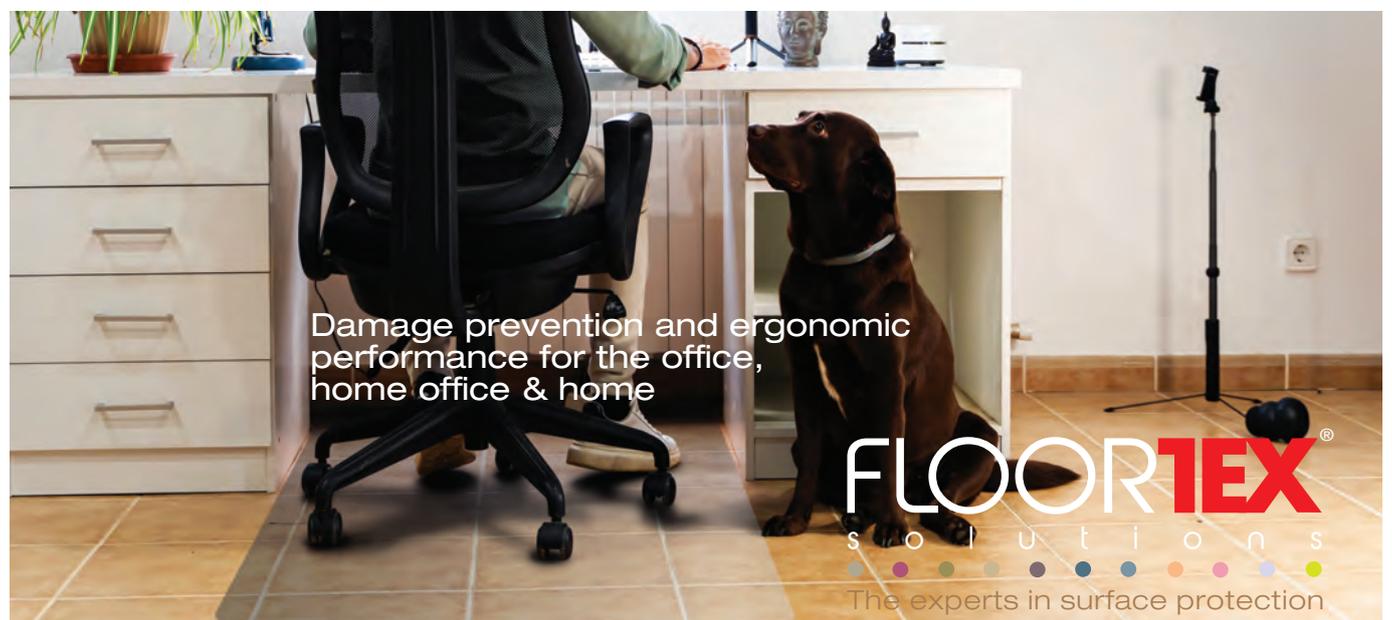

Polycarbonate
The toughest chair mat material for the ultimate in durability and ergonomics.

Enhanced Polymer
Reduce your carbon footprint with these 100% recyclable chair mats.
Manufactured from up to 50% recycled EP.

Polypropylene
The next generation of eco-friendly foldable chair mats that provide floor protection with a reduced carbon footprint and great value prices.

Phthalate Free PVC
Economical easy glide material for excellent floor protection.
Super safe PVC Vinyl.

Chair mats are versatile, they can be used to protect floors from all kinds of damage, spills, wear and tear.
Also great for use in heavy traffic areas or under heavy objects.
